Ranger Selectors

DEC-RANGER™ DECADE RESISTANCE SELECTOR

FEATURES

Rotary tap switches operate in either direction

Direct digital readout

A precision, ±0.1% accuracy, decade resistance box. The unit has a sturdy metal housing, universal binding posts and a grounded metal post for effective shielding.

Power	0.5 watt per resistor.
Accuracy	$\pm 0.1\%$ (plus 0.03Ω maximum contact and circuit resistance)
	±20 PPM/°C
resistors	
Number of	6
decades	
Range	1Ω thru 1,111,110Ω in 1Ω increments
Switch life	in excess of 50,000 operations
Dimensions	$10^{1/2}$ " wide, $3^{3/4}$ " high, $4^{5/8}$ " deep
Weight	3 lbs. 10 oz.

OHM-RANGER® RESISTANCE SELECTOR

FEATURES

- Sliding switches
- · Handy slimline size
- Rugged metal construction

Model No. 3420

An economical, portable resistance selector with a range to over $11,000,000\Omega$, in 1Ω increments. Has three binding posts, one to ground the case.

	Chocca 200V)
Accuracy	±1.0% (≥10Ω) ±5.0% (≤9.99Ω)
Number of decades	7
Range	1Ω thru $11,111,110Ω$ in $1Ω$ increments
Weight	13 oz.

Power 0.5 watts (Do not

exceed 250\/\

CAP-RANGER® CAPACITANCE SELECTOR

FEATURES

- Sliding switches
- · Handy compact size
- Rugged metal construction

An economical, portable capacitance selector with three binding posts, one to ground the metal case.

Accuracy	±2%
Maximum voltage	200 VDC
Residual capacitance	60 pf (typical)
Range	100 picofarads to 11.111 microfarads in 100 picofarad steps
Dimensions	4" x 6" x 1"
Weight	13 oz.
