## 8-Channel, Dual 4-Channel, Triple 2-Channel Multiplexers

## DESCRIPTION

The DG9451, and DG9453 are high precision single and dual supply CMOS analog multiplexers. DG9451 is an 8-channel multiplexer, and the DG9453 is a triple 2-channel multiplexer or triple SPDT.
Designed to operate from $\mathrm{a}+2.7 \mathrm{~V}$ to +12 V single supply or from $\mathrm{a} \pm 2.5 \mathrm{~V}$ to $\pm 5 \mathrm{~V}$ dual supplies, the DG9451, and DG9453 are fully specified at $+12 \mathrm{~V},+5 \mathrm{~V}$ and $\pm 5 \mathrm{~V}$. All control logic inputs have guaranteed 1.4 V high limit when operating from +5 V or $\pm 5 \mathrm{~V}$ supplies and 1.65 V when operating from $\mathrm{a}+12 \mathrm{~V}$ supply.
The DG9451, and DG9453 are precision multiplexers of low leakage, low charge injection, and low parasitic capacitance. They conduct equally well in both directions, offer rail to rail analog signal handling and can be used both as multiplexers as well as de-multiplexers.
The DG9451, and DG9453 operating temperature is specified from $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ and are available in 16 pin TSSOP and the ultra compact $1.8 \mathrm{~mm} \times 2.6 \mathrm{~mm}$ miniQFN16 packages.

## FEATURES

- Halogen-free According to IEC 61249-2-21 Definition
- +2.7 V to +12 V single supply operation $\pm 2.5 \mathrm{~V}$ to $\pm 5 \mathrm{~V}$ dual supply operation
- Fully specified at $+12 \mathrm{~V},+5 \mathrm{~V}, \pm 5 \mathrm{~V}$
- Low charge injection (< 0.5 pC typ.)
- High bandwidth: 270 MHz
- Low switch capacitance ( $\mathrm{C}_{\mathrm{s}(\text { off })} 1 \mathrm{pF}$ typ.)
- Good isolation and crosstalk performance (typ. - 44 dB at 100 MHz )
- MiniQFN16 package ( $1.8 \mathrm{~mm} \times 2.6 \mathrm{~mm}$ )
- Compliant to RoHS directive 2002/95/EC

## APPLICATIONS

- Data acquisition
- Medical and healthcare devices
- Control and automation equipments
- Test instruments
- Touch panels
- Consumer

## FUNCTIONAL BLOCK DIAGRAM AND PIN CONFIGURATION

Device Marking: Yxx for DG9451 (miniQFN16) 4xx for DG9453 xx = Date/Lot Traceability Code

## Vishay Siliconix

| ORDERING INFORMATION |  |  |
| :--- | :--- | :--- |
| Temp. Range | Package | Part Number |
| DG9451, DG9453 | $16-$ Pin miniQFN | DG9451EN-T1-E4 |
| $-40^{\circ} \mathrm{C}$ to $125^{\circ}{ }^{\circ} \mathrm{C}^{\mathrm{a}}$ |  | DG9453EN-T1-E4 |

## Notes:

a. $-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$ datasheet limits apply.

| ABSOLUTE MAXIMUM RATINGS ( $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$, unless otherwise noted) |  |  |
| :---: | :---: | :---: |
| Parameter | Limit | Unit |
| V + to V- | 14 | V |
| GND to V- | 7 |  |
| Digital Inputs ${ }^{\text {a }}$, $\mathrm{V}_{\mathrm{S}}, \mathrm{V}_{\mathrm{D}}$ | $\text { (V-) }-0.3 \mathrm{to}(\mathrm{~V}+)+0.3$ <br> or 30 mA , whichever occurs first |  |
| Continuous Current (Any terminal) | 30 | mA |
| Peak Current, S or D (Pulsed $1 \mathrm{~ms}, 10 \%$ duty cycle) | 100 |  |
| Storage Temperature | - 65 to 150 | ${ }^{\circ} \mathrm{C}$ |
| Power Dissipation ${ }^{\text {b }}$ 16-Pin miniQFN <br>   <br> c, d  | 525 | mW |
| Thermal Resistance ${ }^{\text {b }}$ (16-Pin miniQFN ${ }^{\text {d }}$ | 152 | ${ }^{\circ} \mathrm{C} / \mathrm{W}$ |
| Latch-up (per JESD78) | > 300 | mA |

## Notes:

a. Signals on SX, DX, or INX exceeding V+ or V- will be clamped by internal diodes. Limit forward diode current to maximum current ratings.
b. All leads welded or soldered to PC board.
c. Derate $6.6 \mathrm{~mW} /{ }^{\circ} \mathrm{C}$ above $70^{\circ} \mathrm{C}$.
d. Manual soldering with iron is not recommended for leadless components. The miniQFN-16 is a leadless package. The end of the lead terminal is exposed copper (not plated) as a result of the singulation process in manufacturing. A solder fillet at the exposed copper lip cannot be guaranteed and is not required to ensure adequate bottom side solder interconnection.

## Notes:

a. $\mathrm{V}_{\mathrm{IN}}=$ input voltage to perform proper function.
b. Room $-25^{\circ} \mathrm{C}$, Full $=$ as determined by the operating temperature suffix.
c. Typical values are for DESIGN AID ONLY, not guaranteed nor subject to production testing.
d. The algebraic convention whereby the most negative value is a minimum and the most positive a maximum, is used in this data sheet.
e. Guaranteed by design, not subject to production test.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and/or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.

## Material Category Policy

Vishay Intertechnology, Inc. hereby certifies that all its products that are identified as RoHS-Compliant fulfill the definitions and restrictions defined under Directive 2011/65/EU of The European Parliament and of the Council of June 8, 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE) - recast, unless otherwise specified as non-compliant.

Please note that some Vishay documentation may still make reference to RoHS Directive 2002/95/EC. We confirm that all the products identified as being compliant to Directive 2002/95/EC conform to Directive 2011/65/EU.

Vishay Intertechnology, Inc. hereby certifies that all its products that are identified as Halogen-Free follow Halogen-Free requirements as per JEDEC JS709A standards. Please note that some Vishay documentation may still make reference to the IEC 61249-2-21 definition. We confirm that all the products identified as being compliant to IEC 61249-2-21 conform to JEDEC JS709A standards.

[^0]:    Vishay Siliconix maintains worldwide manufacturing capability. Products may be manufactured at one of several qualified locations. Reliability data for Silicon Technology and Package Reliability represent a composite of all qualified locations. For related documents such as package/tape drawings, part marking, and reliability data, see www. vishay.com/ppg?65020.
