The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS products have been discontinued, or will be discontinued soon. Please check the products status on the Hirose website RoHS search at www.hirose-connectors.com, or contact your Hirose sales represente

Specifications herein are subject AT-2600 Series to change without notice. HRS Waterproof Fixed Attenuators (N Type) 12.5 46 (19.4) 5/8-24NEF-2B 5/8-24NEF-2A

Features

- 1.It conforms to a waterproof and a dustproof standard of IEC529 and IP65W.(*1engagement)
- 2.A high frequency performance excellent by Hirose Electric original high frequency matching technology is achieved.
- 3. The metal film resistor is used for the attenuation element and the high trust design.

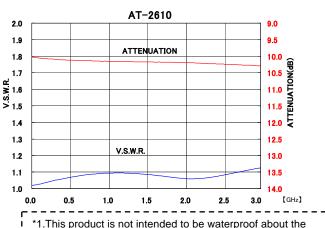

Typical Data

Applications

Mobile Phone Base Stations and Other High Frequency Applications.

Specifications

*1.This product is not intended to be waterproof about the connector opening. When connecting this product with cable or other electric device, be careful so that there is no water based material leakage in the connector. Moreover, be sure that the start point of the processing (taping etc) is roof of the connector regarding the waterproof processing at the mating part of the connector.

Part Number	Frequency (GHz)	V.S.W.R. (MAX)	Attenuation (dB)	Power (W)	Connectors
AT-2606	DC-3	1.3	5.3-6.7	16	N-P·J
AT-2610	DC-3	1.3	9.0-11.0	16	N-P·J
